

EDGE | state™

Any smart lock, any business –
controlled and managed from the cloud.

Access management that scales with your enterprise.

EdgeState by RemoteLock is the leading cloud-based smart lock management platform, providing complete access control for all your smart locks from a single, easy-to-use dashboard.

Reduce the need for different software and systems for smart locks by bringing everything under one platform. EdgeState combines access control and monitoring for businesses and enterprises. Enjoy easy to use software without breaking the bank.

Everything in one place.

Take complete control of all your connected smart locks from a single easy-to-use dashboard.

 **Complete Access Management**
Schedule and manage access for employees, guests and vendors.

 **Centralized Control**
Manage all of your smart locks and users from anywhere using the intuitive app.

 **Notifications and History**
Stay on top of things with email notifications, text notifications and searchable history.

Ideal for any property.

EdgeState is designed to support any lock and any access need.

 **Use the Locks You Want**
Manage Wi-Fi, Z-Wave, or any other connected lock from the EdgeState platform.

 **Scales with Your Business**
Designed to scale with your needs, whether you manage a small or large business.

 **Manage Access for Every Door**
Support any access need, including elevators, garages, narrow glass doors and more.

Cut costs and save time.

EdgeState's easy-to-use software reduces the need for different software and systems by combining everything under one platform to manage smart locks.

Access Management for the Enterprise

Remotely schedule and manage credentials for permanent or temporary employees, vendors, guests and tenants.

Integrations and API

Take advantage of EdgeState's robust integrations and API to customize the software to your business needs.

Everything In One Dashboard

Don't waste time managing different software and systems for smart locks. EdgeState's centralized, easy to use dashboard puts everything in one place.

Reduce Lost Keys & Rekeying

Remotely managed access reduces reliance on physical keys. When an override key goes missing, just rekey the InstaKey® user-rekeyable cylinder and distribute new keys at a fraction of the cost.

Reduce Equipment and IT Costs

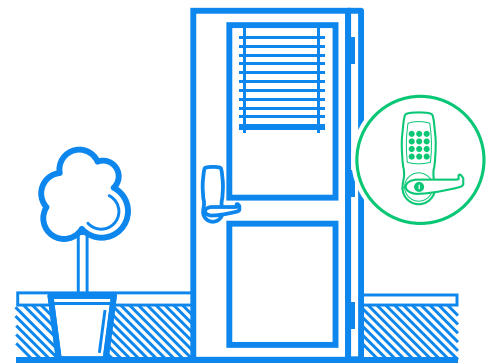

No need for additional gateways or a secondary network in your buildings; Use your existing Wi-Fi networks. The EdgeState software is also easy to use and makes administration easy and efficient.

Support many types of hardware.

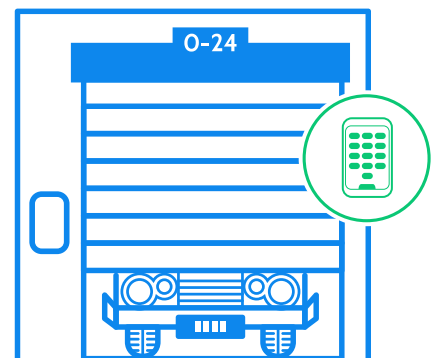

- ✔ Mercury control panel for ACS wired doors.
- ✔ RemoteLock OpenEdge series of Wi-Fi enabled smart locks for residential, commercial, and business grade applications.
- ✔ Use Z-Wave smart locks through Vera Gateway integration.
